Frameworks: React, Node.js, HTML5, CSS3

Tools: Git, GitHub, Agile, Scrum, SDLC

EDUCATION

B.Sc. Computer Science | SDC |
TamilNadu.

Graduated: 2022

| SUMMARY

Software Engineer with 3+ years of professional testing experience in enterprise-level Supply Chain Management systems. Currently transitioning into Java Full Stack Development by combining a strong foundation in Java and SQL with modern frontend frameworks like React and Bootstrap. Expert in debugging complex code and optimizing backend performance, now focused on building scalable, end-to-end web applications.

| EXPERIENCE

Software Test Engineer | SOFTEON

July 2022– Dec 2025

- Tested high-scale WMS for global clients like UPS Healthcare and Optum.
- Performed SQL backend validation to ensure data integrity across workflows.
- Managed defect lifecycles, collaborating with developers for 100% bug resolution.

| PROJECTS

- Java Full Stack Development | SLA (In Progress)
- Developing full-stack applications using Java and React.
- Building responsive UI components with Bootstrap and JavaScript.
- Implementing RESTful APIs and integrating them with SQL databases.

| CERTIFICATION

- PGDCA course (C, C++, Java, MS-office) | TNCC
- WMS Certification course | SOFTEON

| CORE COMPETENCIES

- | | |
|-------------------------|-------------------------|
| • Data Structures (DSA) | • System Design & OOP |
| • Database Management | • Scalable Architecture |
